Announcement: Canadian Sleep Medicine Fellowship
from the Canadian Sleep and Circadian Network (CSCN)

The Canadian Sleep Medicine Fellowship is intended to support research training that will facilitate an academic career in sleep medicine. The successful applicant will complete advanced clinical training in Sleep Medicine (1 year) followed by 1-2 years of scholarly activity supervised by an established investigator/scholar at a Canadian university working in a discipline that is relevant to Sleep Medicine.

Funding:
$25,000 per year for a maximum of 2 years to provide partial salary support exclusively for non-clinical activities.

Eligibility criteria:
1. Applicant must be eligible for specialty certification from the Royal College of Physicians and Surgeons of Canada (or equivalent) in one of the following:
   • Respiratory Medicine
   • Neurology
   • Psychiatry
   • Paediatrics (in one of the following subspecialties):
     o Respiratory Medicine
     o Neurology
     o Developmental pediatrics
2. Clinical training in Sleep Medicine must be eligible to meet the requirements of the Royal College of Physicians and Surgeons of Canada Area of Focused Competence program
3. Proposed Research training must be supervised by an established research program in a discipline that is relevant to sleep medicine, and provide funding to make up the balance of a salary that is appropriate for the applicant’s level of training

Application process:
• Outline of the applicant’s clinical training in Sleep Medicine (max 1 page)
• Outline of the applicant’s proposed research training (max 2 pages)
• A letter from the training center(s) confirming that it is meeting all of its requirements
• Applicant’s CV
• Names and contact information of 3 referees
All documents should be submitted as a single pdf to Dominique Petit (dominique.petit.1@umontreal.ca). Applications will be adjudicated as they are received

Expectations:
The awardee must submit an annual report to the training committee of the CSCN and present the results of his/her research/scholarly activities at the biennial meeting of Canadian Sleep Society.
